Oklahoma State University

Dr. Abit focuses

in 2012. Dr. Abit focuses

He is a member of the

Department of Plant and Soil Sciences

Dr. Abit received a B.S. in Soil Science at the North Carolina State University in 1995 and a Ph.D. in Plant and Soil Sciences at the Oklahoma State University in 2000. Dr. Abit worked as a research scientist at the Oklahoma State University before joining the faculty in the Department of Plant and Soil Sciences at the Oklahoma State University in 2002. He is currently an Associate Professor and teaches Plant and Soil Sciences. He is also a member of the Oklahoma State University Environmental Science Program Steering Committee. He also serves on the State Specialist

Dr. Abit's Research Interests

Dr. Abit's research interests are in the area of soil science and plant growth. He is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield. He is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.

Dr. Abit is currently working on the effects of soil moisture and nutrient availability on plant growth and yield. He is also interested in the effects of soil pH and soil texture on plant growth and yield.
